mechanics and
engineering**

Contents Volume 162

Volume 162, Nos. 1-4, 25 August 1998

Adaptive H - and H - R methods for Symm's integral equation <i>T. Cao</i>	1
A numerical solution technique for a class of integro-differential equations in elastodynamic crack propagation problems <i>F. Costanzo and J.R. Walton</i>	19
Uniformly convergent finite element methods for singularly perturbed elliptic boundary value problems: convection-diffusion type <i>J. Li and I.M. Navon</i>	49
An arbitrary Lagrangian-Eulerian finite element method for solving three-dimensional free surface flows <i>A. Soulaïmani and Y. Saad</i>	79
Torsion problem of rectangular cross section bar with inner crack <i>Y.Z. Chen</i>	107
An improved domain decomposition method for the 3D Helmholtz equation <i>A. Piacentini and N. Rosa</i>	113
Dynamic interaction between the vehicle and simply supported curved bridge deck <i>V. Mermertas</i>	125
Form error evaluation using L_1 -approximation <i>V.N. Narayanan Namboothiri and M.S. Shunmugam</i>	133
A simple orthotropic, transversely isotropic hyperelastic constitutive equation for large strain computations <i>J. Bonet and A.J. Burton</i>	151
Hybrid upwind methods for the simulation of unsteady shock-wave diffraction over a cylinder <i>J. Zóltak and D. Drikakis</i>	165
Computerized design and generation of modified spiroid worm-gear drive with low transmission errors and stabilized bearing contact <i>F.L. Litvin and M. De Donno</i>	187
An adaptive approach with the Element-Free-Galerkin method <i>U. Häussler-Combe and C. Korn</i>	203
Modal characteristics of cracked rotors using a conical shaft finite element <i>M.A. Mohiuddin and Y.A. Khulief</i>	223

Explanation and elimination of shear locking and membrane locking with field consistence approach <i>L. Yunhua</i>	249
Use of high accuracy schemes to handle free surfaces in computing unsteady two-phase flows <i>V.M.G. Mollá, J.L.M.-C. González and L.L. Zamora</i>	271
The finite deformation theory for beam, plate and shell Part III. The three-dimensional beam theory and the FE formulation <i>M. Li</i>	287
Nonlinear static and dynamic analysis of shell structures with finite rotation <i>J.L. Meek and Y. Wang</i>	301
Element-Free Galerkin solutions for Helmholtz problems: formulation and numerical assessment of the pollution effect <i>Ph. Bouillard and S. Suleau</i>	317
Studies in material parameter sensitivity of softening solids <i>M.A. Gutiérrez and R. de Borst</i>	337
The influence of the linearisation of the yield surface on the load-bearing capacity of reinforced concrete slabs <i>P.C. Olsen</i>	351
Simulation of miscible displacement in porous media by a modified Uzawa's algorithm combined with a characteristic method <i>D. Yang</i>	359
